  - > Java, HTML, CSS, Java-Script.
- Frameworks:
  - > Spring MVC, Spring-Boot, Hibernate, Restful Web Services
- Databases:
  - > PostgreSQL, Oracle, MySQL
- Operating Systems:
  - > Windows

## HOBBIES

- Reading Books
- Running & Exercise
- Singing
- Playing Cricket

## CERTIFICATIONS

- Java Full Stack Development

## PROFESSIONAL EXPERIENCE

### Java Developer

**Acutec Global Services LLP | April 2023 – Present**

#### **Applications:** RFMS.

**RFMS:** The need for an application like RFMS arised in Banks, when there was a requirement raised for processing bulk NEFT Outward, RTGS Outward and IFT based transactions. We also had to think from our CBS point of view, so that too much load in that application does not impact the entire financial as well as the non-financial transactions processed during the day. The processing of bulk files has not only got streamlined but Banks Operations team are also able to save a considerable amount of time in completing their activity. Further, the creation of messages & entire validation of 'NEFT 24 by 7' as well as 'RTGS' transactions from SFMS / RBI point of view, is automated and taken care by the **RFMS** itself.

**Platform:** Windows

**Database:** Oracle, PostgreSQL, SQL

**Technology:** Spring-4 MVC, Spring Boot MVC, Hibernate, Jdk-8 .

**Server :** Tomcat

#### Role and Responsibility:

- Involved in development and code.
- Involved in Client Meeting.
- Involved in Code Refactoring.
- Involved in Bug Fixings.
