---

**Objective**

A highly motivated and passionate AI Intern seeking to contribute innovative ideas and skills to BoticX Labs. Eager to assist in developing AI solutions, enhancing web and backend development tasks, and contributing to cutting-edge technology projects in a collaborative environment.

---

**Education**

**MSU** – [Saharanpur]

Bachelor of Technology in Computer Science (or relevant degree) – [Month/Year of Graduation]

---

**Skills**

- **AI Algorithms & Models:** Experience in implementing and optimizing machine learning and deep learning models.
  - **Backend Development:** Knowledge of server-side scripting, database management, and API integration.
  - **Frontend Development:** Familiarity with frontend technologies like HTML, CSS, JavaScript, and web frameworks.
  - **Programming Languages:** Python, JavaScript, SQL, HTML, CSS.
  - **AI Technologies:** TensorFlow, PyTorch, scikit-learn.
  - **Tools & Frameworks:** Git, Flask, Django, REST APIs.
- 

**Professional Experience**

**AI Intern** – BoticX Labs, [Location]

[Month/Year – Present]

- Collaborated with the AI team to design, develop, and implement innovative AI solutions for a variety of client projects.
  - Assisted in the development of AI algorithms and models for applications in automation and intelligent systems.
  - Worked closely with the frontend team to create intuitive and user-friendly interfaces for AI-powered applications.
  - Supported backend development tasks such as designing databases, writing server-side scripts, and creating API integrations.
  - Contributed to research efforts by staying updated with the latest trends and advancements in artificial intelligence and machine learning.
  - Participated in team meetings, brainstorming sessions, and strategic discussions to explore new ideas and strategies for AI development.
  - Took on additional tasks related to client projects, including coding, documentation, and testing.
- 

## **Projects**

### **AI-Based Automation System**

- Developed a machine learning model for intelligent automation of business processes.
- Worked with the backend team to implement the solution within an existing framework.

### **AI-Enhanced Web Application**

- Assisted in creating a web-based platform using AI for data analysis and predictive insights.
  - Integrated AI algorithms into the application and collaborated with the frontend team for seamless user experience.
-

## **Certifications**

- **AI and Deep Learning Specialization** – [Provider]
  - **Frontend Web Development Certification** – [Provider]
  - **Backend Development with Python** – [Provider]
- 

## **Additional Information**

- Strong ability to collaborate with cross-functional teams.
- Enthusiastic about learning new AI technologies and keeping up with industry trends.
- Detail-oriented, proactive, and highly organized in project management and execution.
